

How to uninstall ClickShare Desktop app (version 4.3 and above) massively

Article number: **[4796]** - Legacy code: **[KB11526]**

 Access restricted to registered, pre-approved users.

This article applies to the following products:

[Application de bureau ClickShare](#) [ClickShare C-10](#) [ClickShare C-5](#)

Quick simple PowerShell script solution

1. Enable RemoveSigned policy (The default policy is not allowed to run the unauthorized script! We need to enable it)
Run "Windows PowerShell" as administrator
 > Set-ExecutionPolicy RemoteSigned -Force
2. Remove ClickShare
Run "Windows PowerShell" with Update_UninstallClickShareSetup.ps1 (script is available in the Downloads section below)
 > .\Updated_UninstallClickShareSetup.ps1

Verification items

- The following Registry Keys are removed
 Computer\HKEY_CURRENT_USER\Software\Barco\ClickShare Client
 Computer\HKEY_CURRENT_USER\Software\Barco\ClickShare Installer
 Computer\HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\Uninstall\ClickShare
- The following folders are removed
 %LocalAppData%\ClickShare
 %LocalAppData%\Barco
- The following shortcuts are removed (You can also take a look at the Desktop and Start Menu directly)
 %AppData%\Microsoft\Windows\Start Menu\Programs\Barco\ClickShare.lnk
 %UserProfile%\Desktop\ClickShare.lnk
- The ClickShare can **NOT** be found in **"Add or remove programs"**
